OF INTEREST TO THE WOMEN

FROM WOMAN'S POINT OF VIEW

It costs a great deal to be well-dressed, for that means perfection of detail, clothes for all occasions, and all the accessories and touches of fashion. The woman of fashion could not possibly attend to her own wardrobe, therefore is to be found a large class of well-trained ladies' maids and an army of sewing women to assist them. The middle-class women have quite enough to do if they keep their wardrobes in decent condition, for they have reached the belief that they need a multiplicity of garments, but feminine wage-earner can look very pretty and neat on a wardrobe that will not tax either pocketbook or leisure un-

The foundation of a wardrobe is underwear, four sets of which are enough for ordinary use. Woven combinations, or union suits, as they are known, are most economical, because they represent a saving in laundry bills. They certainly improve the appearance, as all unnecessary fullness is eliminated. A chemise or combination corset cover and short petitionat is needed to protect the corset, and one outer petitionat is all that is required under the dress. Two pairs of shoes will answer, but three are better, and they need not be purchased all at once. Occasional additions to a wardrobe keep it up to date, you know.

Four pairs of stockings, carefully mended, will last the season through, and sometimes do better than that. A pair of easy slippers is necessary for bedroom wear, and two wrappers which can be tubbed make appreciable additions to comfort. Fancy articles of this kind are ort left to the extravagant and idle. If undergarments can be made at home, better material can be put into them and they wear much longer, particularly when strong and simple trimmings are used. There are shops where petticoats of all prices are offered for sale, and any one of them will be fitted to a purchaser for the small sum of 25 cents. A smo fitting petticoat helps out wonderfully in a good appearance, and no good dresser overlooks the fact.

A working girl needs a neat, pretty walking suit with enough simple waists to be clean and tidy. If she hopes to keep it looking fresh, she must have a raincoat or a rainy-day costume fashioned from one left from a previous season. Even then there will be frequent pressing and cleaning. Rubbers and umbrellas are Be careful not to let pattern slip.) as necessary as gloves, which must be carefully selected to avoid unnecessary expense. For the house there must be something to wear so that the street clothes may rest, and good planners manage them from cast-offs that do not bear the cold inspection of the public eye. One good hat and a renovated one for inclement weather are the least a woman can have when she is obliged to go out every

Handkerchiefs, neckwear, belts, and veils all come in for a share of attention. and, taken all together, even a simple wardrobe is a care, and a constant one. Right here is where we are often unwise. We add a few frivolous things like a party frock with accessories and an even suit good enough for Sunday and holidays, so we provide another and are poorer in pocket and twice as heavily with care. Then we wonde why we develop nerves and feel tired not yet found the road to wisdom, have we? BETTY BRADEEN.

From the Philadelphia North American. It is said at the watering places mittens will be much worn, and this seems logifashions-they do not hide the gorgeous rings and they are cool and comfortable.

There has even been a change in the where formerly they were of muslin they are now of etamine. Plumetia has even been used edged with valenciennes. but, while novel, the result is not very

Although the Frenchwoman has adopted the collarless gown and revels in its comfort, she is nevertheless unwilling to appear in public places with the neck quite unadorned. She, therefore, relies upon her veil to fill all discrepancies, and she ties it up high on the brim of her hat, leaving many wrinkles under her chin. Such veils must be very wide, but when they are bought in From the Philadelphia Bulletin. Paris they always are.

SHINY LEATHER BELTS.

From the Philadelphia North American Even during the reign of the one-piece gown, the Parisian clung with fervor to the wide patent-leather belt that she prizes so highly as an adjunct to her morning frock. This being true, with what joy did she return to it this spring. when it became allowable, even desirable, to possess a waist line. She wears it enough to reach to the elbow at the back with her frocks of linen, gingham and of the arm, being much shorter ever the even of foulard, and although the combination sounds perhaps a little outre, the effect is very good.

Speaking generally, these belts are black and all widths are worn from one to five inches. The French figure includes usually an extremely small waist, of which the owner is very proud.

MORNING CHIT-CHAT.

THE DRAWBACKS OF PENT-UP CITY LIFE.

"Some people insist," said the pretty kindergarten lady to me, "that a good deal you hear of city children's not knowing anything about the country is exaggerated." "And is it?" I asked.

The pretty kindergarten lady teaches in the slums of one of our great cities, and as she has a very warm heart for her poor little babies, I knew what the answer would be, but I wanted to see her

They did. "Do you think I exaggerate?" she inquired indignantly. I immediately began to protest my firm belief in her truthfulness.

"Because if you don't," she went on, rather ignoring my elaborate protestations, "I'll tell you some of the things that have happened in my school, and maybe you can write about them.

Ruth Cameron.

"Two weeks ago I took a little Hebrew girl that I was interested in on a trip out into the country. Before she came to America she lived in Russia on a farm and they had a cow. In the two years she has been in this country she has never once-once," emphasized the kindergarten lady with an extra snap of her eyes, "been out into the country. If I didn't believe she told me the truth about it I'd know by what happened. For when the train went by a pasture with a cow in it, what do you think she said? 'Mine cow from Russia. Mine cow from Russia.' The poor little thing hadn't seen a cow since she came to the United States, and she thought hers was the only one in the world.

"Another time when we read a story about a butterfly I didn't happen to have any picture, so I described one as well as I could. I said it had a long thin body and some great big wings. A little while before Thanksgiving I took the children down to the markets as we do once a year. The little boy who had been specially interested in what I said about butterflies pulled my dress. "Teacher,' he said, 'oh, teacher, is that a butterfly over there?" I looked and it was a picked turkey hanging up with its wings spread out-a long, thin body and great big wings, you see." The little kindergarten lady's voice had a queer tremor in it and I

looked up in surprise. "I was going to take him out this summer to see some real butterflies, but he isn't here any more," she explained.

Then brushing aside the tears very hastily, for the pretty kindergarten lady is a bit afraid of having her warm heart laughed at-"You'll write about it and say that there are lots of city children that don't know anything about the country, and that the stories about them aren't exaggerated a bit, and that if people would help to get them out

into the country instead of being so unbelieving it would be beautiful." "I certainly will," I promised. So I have.

PINEAPPLE DISHES.

It is said of the pineapple that it is so agreeable no one has to "learn to like it." Besides this praise of its flavor it is also said that the fruit contains an active principle called "ananasine," which possesses active digestive properties. It is hardly necessary to produce more truths that favor the pineapple. Enough has been said to warrant a discussion of a variety of ways for bringing the fruit

First, of course, there is sliced pineapple. The best way to slice it is to peel it, remove the eyes and cut in humblest soil, enriching the surroundings. slices half an inch thick. Sprinkle each slice with sugar and let the pineapple an investment, kindness pays better and remain on ice for three or four hours or surer dividends than any other attribute. even for a longer time before serving. It is the sowing of tact in its gentlest form—the art of accepting good as a the eyes and then with a strong silver motive over all things and by criticism fork tear the meat from the core. Add long deferred. the sugar and let it stand for a time 404 Eighth stre before serving. Pineapple for preserving Kindness may be defined as the oil may be prepared in either of the foregoing ways. For preserving, put the fruit into a jar, after weighing it, cover daily intercourse with one another, prewith three-quarters of its weight in venting friction and outward collisi with three-quarters of its weight in sugar, cover closely and set away for twenty-four hours. Put into the preserving kettle, cook for five minutes, remove the scum that rises and put into jars at once. Pineapple may be prepared with the sugar, left over night and then put into jars without cooking and kept for some time if it is in a cool who have wronged us. Kindness prompts. and kept for some time if it is in a cool who have wronged us. Kindness prompts

LADIES' ONE-PIECE APRON AND CUFFS.

Paris Pattern No. 1838

This new design in a one-piece apron offers utility as well as beauty in that important over-garment which is so indispensable to neatness. Open under the arms and widened out over the shoulders in a square bretelle effect, it is cut to cover the entire dress, both back and front, and is slipped on over the head. The pattern is in 4 sizes-32, 86, 40 and 44 inches bust measure. For 36 bust the garments need 5% yards of material 27 inches wide or 4% yards 36 inches wide; & yards of insertion to trim.

Some gained a gramme and a and the victims of hysteria. Their treathalf, some two, and some even three ment by suggestion, as at Lourdes, is too kilogrammes. Meanwhile, the cough well known to be cited here. We have ceased, and the expectoration diminished; also passed over the employment of sughose who had been unable to touch food gestion by country quacks. Nor need we began to eat; those who had been unable speak of patent medicines, which—like to sleep now slept all night. And if, to Puro, the water of Lourdes, and the

And yet one is not to conclude that in

patient's temperature rise or arrested biliary secretion or stopped the falling the discovery and therapeutic virtue of of hair or the swelling of knuckles. Never antiphymose, all those little bluffs in has suggestion cured pneumonia or diphyolved in the house physician's taking theria or a broken bone. Suggestion acts the temperature and the weight of the solely upon the nervous system and by patients, were simply a mise en scene designed to create a sort of suggestion and in the progress of a disease it merely to re-enforce it as much as possible. And modifies certain accessory symptoms, or, it was manifestly suggestion, and not the perhaps, may, in a certain measure and injections of pure water, that checked the indirectly, affect certain secondary lesions fever, arrested the cough, diminished the that are dependent upon the nervous sysexpectoration, revived the appetite, and tem. I believe that this is what explains the cures obtained by suggestion when Accordingly it is not unreasonable to it is applied by means of a harmless drug suppose that all the drugs given to con- or by a system of therapeutics that runs sumptives act in this way, and that sug- counter to all the data of physiology. Bu these latter are not always slow to reas apeutic measure most advantageous in sert their rights, for a suggestion can be the treatment of tuberculosis. This exsumptive changes doctors he gets on bet- neously-auto-suggestion-cr be set into

and lights with hope the path of the gated and transmitted along the nerv wretched consumptive." But these are not the only patients ca- nerves are canals, like the blood vesse potent to neutralize in some measure and When a nerve is cut, the muscle, the skill

You recall that when the Germans began their agitation against beef extracts therein. If that is the case, I say; but is

lit came to light that Puro was the one that the case?
